(54) Title: **NUTRITIONAL COMPOSITION FOR WOUND HEALING**

(57) Abstract: A nutritional composition for promoting wound healing comprises a protein source, a lipid source and a carbohydrate source wherein no more than 1.8 % of the total calories of the composition derive from arginine and wherein the protein source includes proline in an amount of at least 3 % of the total calories of the composition. The composition may be administered orally and is particularly suitable for the amelioration of pressure ulcers although it may also be used with advantage in the nutritional management of acute wounds including pre and post surgery.
